

NetWorker Module for Microsoft and Data Protection Add-in for SCVMM 9.0.0 Cumulative Hotfixes

Cumulative hotfixes are periodically issued. They combine various individual hotfixes that might have an impact on customer production environments.

Dell EMC has removed NW & Modules v9.0.x packages from support.emc.com to encourage customers to adopt later more stable versions.

Customers are encouraged to move to a later version of NetWorker, specifically NetWorker 9.1.1.4 or later.

The current cumulative hotfix is NetWorker Module for Microsoft and Data Protection Add-in for SCVMM 9.0.0.8 Build 524.

The cumulative hotfix was released on July 11, 2016.

You can download the latest Cumulative Hotfixes package for NetWorker Module for Microsoft and Data Protection Add-in for SCVMM 9.0 at:

ftp://ftp.legato.com/pub/NetWorker/NMM/Cumulative_Hotfixes/9.0.0/9.0.0.8

FREE NetWorker 9 Training available (additional FREE sessions are now available)

In order to benefit from the many enhancements and functionality improvements, EMC strongly encourages all customers (experienced NetWorker users included) to review the free NetWorker 9 Differences eLearnings. Additionally, EMC recommends attending NetWorker 9 Instructor Led training to gain in-depth knowledge and hands-on lab experience. All NetWorker 9 training can be found [here](#)

Installation and De-installation Instructions

Information on installing and de-installing NMM software is provided in the NMM 9.0 Installation guide.

Information on installing and de-installing Data Protection Add-in for SCVMM software is provided in the *NMM for Hyper-V VSS 9.0 User Guide*.

You can access the documentation on Support.emc.com at https://support.emc.com/products/1136_NetWorker-Module-for-Microsoft-Applications and then click the documentation link and select the appropriate Installation guide for the appropriate NMM version.

Note: To be notified when there are document changes, or Product Advisories, please register using 'Preferences' (on the above page) and select the various subscriptions or Alerts you wish to receive.

You must have a valid service agreement to use this site.

Cumulative Hotfix 9.0.0.8

Dell EMC has removed NW & Modules v9.0.x packages from support.emc.com to encourage customers to adopt later more stable versions.

Customers are encouraged to move to a later version of NetWorker, specifically NetWorker 9.1.1.4 or later.
